

Genetic Counselling

You should be referred to us if you have:

A personal or family history of cancer

A family or personal history of a genetic condition

A partner that is a close blood relative

A pregnancy over the age of 40

Multiple early miscarriages

An abnormal screening test or ultrasound during your pregnancy

Exposure to teratogens (e.g. drugs, medication, alcohol, toxic substances) during pregnancy

Those whose ancestry places them at increased risk

Family members with genetic syndromes, developmental or intellectual delays, hearing/visual impairments, or birth defects

With our genetic expertise and counselling skills, we help individuals and families understand **genetic disorders**, **assess their risks** and **make informed decisions about their health**
